

Scottish Forestry Strategy - discontinued indicators	Reason for discontinuing
Climate Change	
Number of non-domestic, wood fuelled energy systems installed	RHI data collected by UK Govt.
Timber	
Sales of improved nursery stock	Trend information complete
Volume of certified timber from Scottish forests	Trend information complete
Business development	
Forestry's contribution to Scottish gross value-added	Future studies will be commissioned
Employment supported by the forestry related sector	Future studies will be commissioned
Proportion of statutory development plans recognising woodland benefits	Trend information complete
Numbers of people enrolling/registering for forestry related short courses, qualifications and MA programmes	Trend information complete
Numbers of people completing forestry related short courses, qualifications and MA programmes	Trend information complete
Forestry's contribution to Scottish tourism gross value-added	Future studies will be commissioned
Community development	
Number of community groups involved in owning or managing woodland	Trend information complete
Number of schools providing vocational courses that include forestry related skills	Trend information complete
Number of land parcels sold or leased under the National Forest Land Scheme	FES will record future data
Area of land parcels sold or leased under the National Forest Land Scheme	FES will record future data
Independent satisfaction rating of community partnerships on the national forest estate	FES will record future data
Environmental quality	

Scottish Forestry Strategy – discontinued indicators

Number of forestry operations or activities leading to direct pollution of the water environment	Data continuity issue
Number of current management plans for scheduled monuments in forests on the national forest estate	FES will record future data
Number of monuments in forests protected under a current forest management plan or agreement	Data continuity issue
Biodiversity	
Progress against Habitat Action Plan targets for native woodland condition	Reporting requirement ended
Progress against Habitat Action Plan targets for native woodland restoration	Reporting requirement ended
Progress against Habitat Action Plan targets for native woodland expansion	Reporting requirement ended
Proportion of woodland related UK bap species & habitats stable or increasing/recovering or in favourable condition	Data captured under Designated Sites in Favourable Condition Action Plan
Woodland structure: mean deadwood volume	Data not available
Woodland structure and composition: mean understorey shrub layer cover	Data not available
Woodland structure and composition: mean no. tree and shrub species within stands	Data not available
Woodland structure and composition: old growth as a proportion of Scotland's woodland cover	Data not available
